

NON-CONTACT AC VOLTAGE DETECTOR

90V - 1000V AC, CAT II Insulation

ADI
PRO

This ADI Pro non-contact AC voltage tester is the perfect addition to the professional installer's tool kit, allowing the user to test live wires and conductors without coming into contact with them. The detector features audible and visual notifications, allowing the user to identify the presence of live voltage quickly and effectively. Operated by two AAA 1.5 V batteries, and with up to 6 hours battery time, the tester can be used on the job in a range of environments. With CAT II insulation included, it offers a safe and reliable tool that can be used with confidence. The lightweight and compact design also ensures that the tester can be easily stored or carried in a pocket via the pocket clip featured at the end.

WBXAC-DETECTOR

Product Specifications

UPC	840049306127
Maximum Voltage	1000V AC
Safety Category	CAT II 1000V
Continuity Check	No
Display Type	LED
Power Source	Battery
Battery Type	AAA
Dimensions	152 x 4.5 mm
Length	152 mm
Tip Width	4.5 mm
Weight	58 g
Part #	WBXAC-DETECTOR

FEATURES

Ideal for 90 V - 1000V AC

Thin probe tip ideal for working with wall outlets and tight spaces

Audible and visual notifications allow the user to effectively identify the presence of live voltage

Lightweight and durable design, with a pocket clip for easy storage

Operated by two AAA 1.5 V batteries, with up to 6 hours battery time
