

# OUR CONTRIBUTION FOR A SAFE FUTURE

MB-Secure – a control panel  
which sets standards and  
meet your requirements

*"The individual solution for  
a safe future - completely  
tailored to my needs"*

**Honeywell**

# HONEYWELL COMMERCIAL SECURITY

## | Your partner for building security systems

As a renowned manufacturer with decades of experience for Security Systems we have a long-time and sustainable partnership with our customers.

With Honeywell Commercial Security you trust the market leader who is responsible for installers and customers throughout the world, who offers continuity and reliability for future-oriented business strategies.

### **Innovation for integrated Security solution**

With WINMAG plus, one on your needs suitable hazard management system, we offer integrated solutions for intrusion systems, Access control and

video surveillance from a single source and develop complete solutions for professional application. The various safety-relevant systems can be centrally managed, monitored and controlled.

### **Security for planning and investment - we adapt**

Over time, the security requirements change. MB-Secure faces these challenges and adapts to every new condition. Our web portal offers continuously license options, on which installers can access at any time for functional extensions.

You profit from innovative solutions of all requirements around building security.

### **Certified standard according to VdS**

We can assure you that our technology always meet the highest requirements and the prescribed Security standards. Under compliance with VdS guidelines we enable and guarantee the operation with trained and certified installers.

### **Integration – Gewerke**

*"Trust the strong network and know-how of our certified specialist installer."*

# **BENEFIT** FROM OUR PARTNER NETWORK

## **Short distances for demanding solutions.**

Highest level of commitment, utmost care and know-how. Challenge us and benefit from the performance of Honeywell Commercial Security.

The partnership between installers and Honeywell offers you the necessary technologies and resources to support the buildings and properties in the future. You can trust on our technical support and our competent team. Regular training, information and project consulting always ensure the latest technical developments. Everything in favor of our customers who expect quickly expert answers, a professional customer service, as well as know-how and quality.

# CORE ELEMENT OF OUR SECURITY SOLUTIONS IS OUR MB-SECURE

## | Our future-proof solution with potential for savings

The MB-Secure is the innovative panel which integrates the hardware, firmware, licensing and future Security into one integrated platform. This pioneering technology platform allows the tailor-made configuration - through the option as well as to define a few users or a large number of users and the possibility to connect various readers and operating units directly, the MB-Secure is the ideal solution for both small and large, integrated systems.

The MB-Secure is the first control panel, in which functionality and performance spectrum can be expanded via licensing as on customer need the motherboard

can be used by applying the necessary license key for each installation. In the long term, it also represents a decidedly cost-effective decision and our customers appreciate its cost benefits.

*The MB-Secure is pre-configurable, the performance scope of the panel can be adopted however to every individual Security requirement. Also further extensions are possible without the exchange of the panel hardware.*

- Kiosk, apartment, small detached house store (e.g. chain stores)
- Two-family house, kindergartens, Small business
- Multi-family house, municipal area, Food & Electrical Markets
- Commercial, Corporate & Administrative Buildings, production facilities, banks, Financial institutions
- Museums, historical sites, Art
- Commercial, very large plants, Production

# SECURITY UNLIMITED

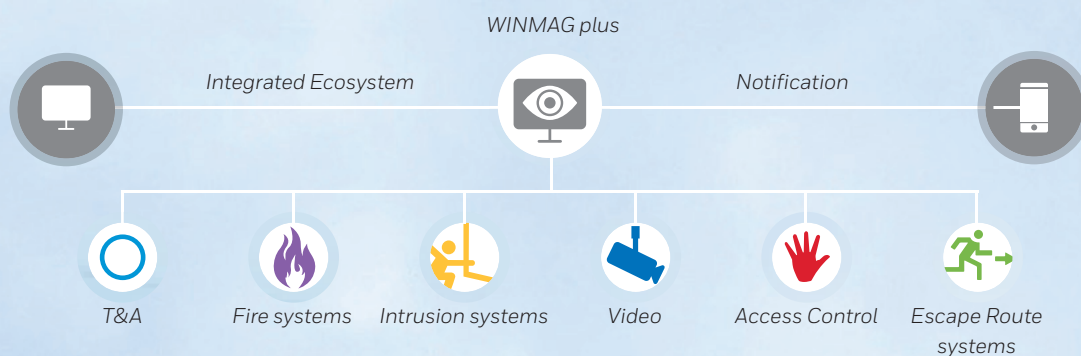

## Innovative software for sustainable hazard management.

Honeywell Commercial Security offers cross-trade solutions for a wide range of applications in hazard management.

Such integrated systems consist of the sum of several individual trades. The hazard management system WINMAG plus bundles the information of all integrated systems under one user-friendly operating surface and offers far-reaching control functions.

The well-thought complete solutions can - individually adapted to the respective needs - include intrusion detection technology, access control, Time Hazard management, Video technology and escape route technology. This allows access to up to 512 doors and 10,000 users directly per one MB-Secure.

Via open interfaces to third-party systems there are almost unlimited integration options available. It is possible as of the adaptation of the corresponding software packages and the standard interface (TCP/IP). The benefits for your companies are obvious: Economic efficiency, simple extensibility, great flexibility and the latest technologies.

*"The versatility of the MB-Secure is illustrated by the wide range of applications on different objects"*

# FLEXIBLE COMPONENTS FOR YOUR INDIVIDUAL REQUIREMENTS

## Multifunctional – we keep moving

**TouchCenter plus** – The MB-Secure can be operated intuitive and dialogue-guided. The uniform user interface makes it easier for installers to program, allowing the customized assignment of key functions. For the user, the intuitive design and clear arrangement of functions also bring tangible benefits.

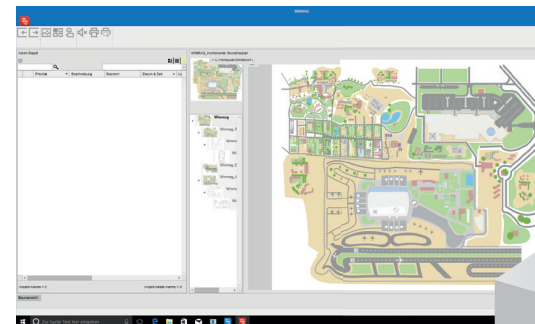

**Viewguard** – the DUAL motion detectors have two independent working sensor systems, PIR motion detectors and microwave sensor. The operating principle of the detector is based on an intelligent linking of the two sensor systems and is characterized by optimal alarm detection at extremely high false alarm security. For complete detection, the detectors have a high-quality mirror optic.

**LuminAXS** – the reader is suitable for arming and disarming of the intrusion alarm system and offers additional access control functions. In addition to the flat and robust housing the reader is available in various interfaces so that a wide range of applications is offered.

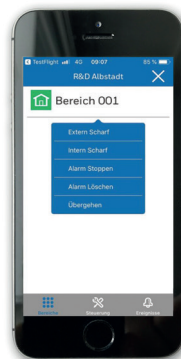

**Sensors and detectors** – recognize reliable danger. Our detectors and sensors guarantee a reliable indoor and outdoor surveillance and increase the sense of safety.

# OUR VISION IS YOUR SECURITY IN PLANNING AND INVESTMENT

| So that you will feel safe in the future.

With the MB-Secure, Honeywell Commercial Security provides an intrusion panel of the latest generation, which enables cross-trade applications for specific and changing requirements. Due to the versatility of the MB-Secure a

wide variety of objects can be equipped, individually licensed and configured-tailor-made, intelligent security solutions for wide range of industries.

The MB-Secure also offers flexibility for future requirements. Should your security requirements change over time – the MB-Secure can be customized at any time. Future extensions can be realized also at any time through simple licensing.
