BOUNDARY OUTDOOR DETECTOR BX SHIELD series

Where flexible performance meets
modern design

The BX SHIELD is a series of either side
detectors providing 12 m side by side
(total 24 m / 80 ft) coverage:

Black and white models

BXS-ST: 12 m / 40 ft side by side (total 24 m / 80 ft)
BXS-AM: with anti-masking
BXS-R: Battery operated 12 m / 40 ft side by side (total 24 m / 80 ft)
BXS-RAM: with anti-masking

SHIELD: the new shape of security

4 PIR SENSORS, IR DIGITAL ANTI-MASKING AND SHIELD CONCEPT DESIGN

Reliable

12 m / 40 ft. each side long and narrow high sensitivity detection area

AND logic function to reduce false alarms

The BX SHIELD only triggers an alarm signal when both upper and lower detection areas detect movement.

Individual detection area and sensitivity setting

Left and right detection ranges can be independently adjusted. (2.5 to 12 m in 5 steps)

Extreme high detection mode

For environments where the temperature difference between the human body and the background is very small, the extreme high detection mode increases the PIR sensitivity to avoid any missed alarm.

Normal			Extreme		
Normal Low	Normal Mid	Normal High	Extreme Low	Extreme Mid	Extreme High

SMDA (Super Multidimensional Analysis) logic

All BX SHIELD models feature a digitally enhanced signal recognition logic called SMDA. By analyzing the detection patterns and environmental information SMDA can differentiate between a number of noise factors such as changes in weather conditions and vegetation sways; and genuine intrusions. This intelligent processing makes the sensors very reliable.

4 PIR technology

The detection range, sensitivity, alarm output can be set separately for the left and right detection areas. The sensor can differentiate between large and small objects within the detection area, reducing false activations and ensuring genuine intruder detection.

IR digital anti-masking function

Active IR anti-masking detects when the lens surface has been covered, blocked or painted.

Individual signal outputs (Right and Left)

The BX SHIELD triggers independent alarm signals for the left and the right detection areas which is useful when connected to PTZ cameras.

Convenient

90 degrees rotation open
Easy to open / close cover

Level indicator
The BX SHIELD series features a level indicator to ease the installation process.

Blue Touch™

All accessible parts are colored in blue, making an installation a more friendly procedure.

All the components needed for the sensor's adjustment and settings are in blue.

Easy to adjust the detection area

Automatic walk test mode

Walk test mode will time out after three minutes and the setting will return to "normal mode".

Secure

A sense of security, designed for you

Flat profile supported by an internal honeycomb structure ensures durability.

Optional color variations for a face cover can make installations less obvious.

Optical lens units are sealed and re-enforced to add extra strength.

Back tamper

Trouble output activates when face cover, chassis as well as back box is removed.
